

Export Control Classification Number (ECCN)

ECCNs are five character alpha-numeric designations used on the Commerce Control List (CCL) to identify dual-use items for export control purposes. An ECCN categorizes items based on the nature of the product, i.e. type of commodity, software, or technology and its respective technical parameters.

All ECCNs are listed in the Commerce Control List (CCL) (Supplement No. 1 to Part 774 of the EAR), which is divided into ten broad categories, and each category is further subdivided into five product groups. The first character of the ECCN identifies the broader category to which it belongs and the second character identifies the product group

Based on our current state of knowledge resistor products supplied by ARCOL UK LTD are not specifically listed in Commerce Control List (CCL) and are therefore listed as EAR99. However, electronic components have general listing under;

3A001 / 3A101 / 3A201

Harmonized System Codes (HS Code)

The Harmonized Commodity Description and Coding System (**HS**) of tariff nomenclature is an internationally standardized system of names and numbers for classifying traded products developed and maintained by the World Customs Organization with over 170 member countries. This relates directly to the Harmonized Tariff Schedule (**HTS**) utilized in the United States.

Electrical resistors (including rheostats and potentiometers), other than heating resistors

Fixed Resistors

carbon resistors, composition or film	8533 100000
General for handling power not exceeding 20Watts	8533 210000
Others (including those greater than 20Watts)	8533 290000

Variable resistors, inc Rheostats and potentiometers

For a power capacity not exceeding 20Watts	8533 310000
Other	8533 390000

Other Variable resistors, inc Rheostats and potentiometers

For a power capacity not exceeding 20Watts	8533 401000
Other	8533 409000

All Other

Parts	8533 409000
