## **Product Change Notice**

Effective August 21, 2017 Ohmite will suspend accepting orders for the HVF Series High Voltage SMD Flip Chip resistors. A change of manufacturing site is planned for November-December 2017 in the interest of increasing capacities and reducing lead times. Backorders not shipped by November 1 will be fulfilled from the new facility and a Product Change Notice announcing the details will be issued prior to commencement of deliveries. Between now and November 1, Ohmite will fill as many HVF backorders as capacity allows from the current facility. Customers with short-term needs for SMD High Voltage Resistors are encouraged to look at HVC Series as an option. HVC Series is a conventional wrap-around terminal high voltage chip resistor.

Best Regards,

Brandon Metzger  
Product Manager

CC: Kirk Schwiebert  
Director of Product Development
