Supporting Data relating to PCN:

In an effort to improve product throughput and quality, Ohmite has implemented use of a new laser marking machine for stamping the 10 series, Surface Mount Power series, and MOX500 series. This stamping change produces a more durable and easier to read stamp. The stamping does not affect the performance or specifications of the parts. Sample pictures below with the full list of part series involved. This change will be implemented on the above part series for date codes indicated in the chart below.
